Since its inception, the Cambridge Community Center has been a frontline resource that has served generations of children, teens, and families throughout Cambridge for over 90 years. The Center has initiated many neighborhood firsts, including the establishment of the first nursery school and the first varsity basketball games open to African Americans. In subsequent decades, the Center has hosted HeadStart Program classrooms, the Riverside Health Care Facility, and a wide variety of community, political, and social events.
RESILIENCE MODES

No two Resilience Hubs are alike. Each community will have different goals and priorities for all three resilience modes. The degree to which they meet their goals can be described as Baseline, Optional, and Ideal.

Baseline sites meet the minimum criteria for being a Resilience Hub and provide community benefit in all three resilience modes. Optional mode incorporates a range of expanded services and resilience-enhancing retrofits as determined by community members. Ideal Hubs meet ambitious goals that provide community benefits year-round and are fully retrofitted to support all community members.

RESILIENT PROGRAMMING
Offering additional services and programs that build relationships, promote community preparedness, and improve residents’ health and well-being.

RESILIENT COMMUNICATIONS
Ensuring the ability to communicate within and outside the service area year-round and especially during disruptions and throughout recovery.

RESILIENT BUILDINGS AND LANDSCAPE
Strengthening the resilience of the facility to ensure that it meets operational goals in all conditions.

RESILIENT POWER
Ensuring reliable backup power to the facility during a hazard while also improving the cost-effectiveness and sustainability of operations in all three operating modes.

RESILIENT OPERATIONS
Ensuring personnel and processes are in place to operate the facility in all three modes.
